

SALTA HD WHEELS

PLEASE READ BEFORE YOU START

Prior to installing the plastic decorative screws into the wheel, use the provided thread cutting bolt to clean the threads. **Failure to clean the threads will result in stripping the plastic threads and/or hex head of bolt.**

To clean the threads:

1. Start the thread cutting bolt by hand and thread it in as far as it will go.
2. Complete the installation using a 13mm socket and run the screw into the threads until it bottoms out. **Use hand tools only. Do not use power tools.**
3. Remove the bolt and repeat for all eight holes.
4. After all of the threads have been cleaned out, Install the plastic decorative screws by hand using a 5mm allen wrench. **Do not use power tools. Do not over torque.**
